Collaborations

From 2009 on Castillo has been participating in the annual Asim'tria Festival, Arequipa, Peru. Asim'tria is a space for exchange, discussion and international collaboration, with converging sectors and actors related to the art, the new media and digital culture. Besides his individual projects, Gabriel Castillo founded groups of experimental music and sonic improvisation, among others:

CASTILLO Using different software and electronic devices (2015 - 2001)

TRIAC Project developed to work with circuits homemade, intervened toys, recyclable material and proposals for real-time processing (2015 - 2008)

IRI Audiovisual project with Gisella Lopez, working with light and sound, investigating the iridescence, seeking alteration of the senses through light and sound (Present – 2010)

Workshops & Educational

Castillo is active in educational activities, designing concepts for research laboratory and sharing his knowledge in workshops on sound art, electromagnetic fields and electronics. One of his workshops is called 'Electronic Art and Experimentacion Electromagnetica'. It is about how to explore elemental physical properties using simple equipment and household objects, and how to listen to and play with forces that are otherwise silent and invisible. It explores examples of transduction –which is the translation of one kind of energy into another, such as chemical energy into kinetic energy.
