

OPEN CALL FOR PARTICIPANTS
choir project 'STEM - VOICE (cycle 3)'
by Janneke van der Putten

Open call for persons interested to participate in 'STEM - VOICE (cycle 3)': a laboratory in choir format to explore the voice through situated connection, echo-location, and spatial phenomena. The laboratory consists of a cycle of five sessions of 1-1,5 hour duration each, and will include singing technique training, choir singing, movement and body practise. No prior singing- or performance experience is needed.

When: Fridays from 19:30 to 20:30.

Getting in: 19:00
Start sharp: 19:30

19.09
26.09
03.10
10.10
17.10

Where: Rotterdam Oud-Charlois.

The location will be emailed to the participants once they confirmed.

Costs:

15€ (incl. vat) - 1 session

To be paid in cash on the session or through banktransfer.

Reserve your spot: Email info@jannekevanderputten.nl for further details.

About Janneke: Janneke (she/her) works a.o. as an experimental vocalist skilled in acoustic techniques and in situ listening. Her artistic work and approach to collective singing relates to how the body, astronomy, geography and spatial positioning can be aligned through a sonic experience. Manifesting a social approach to sound and space, the acoustic and naturally amplified voice connects with the architecture and landscape. In this practise, listening and sound forms a basis for a better world, to be enticed and engaged in finding your own way and attitude towards life.
